

## **JHS-Bus Tracking System**

JHS is happy to inform that the "Entwine Id8 Solution" has been installed in all school buses. "Id8" is specifically designed keeping in view the needed optimal information to parents and school staff managing the operations of school buses.

This product empowers the school bus fleet administrator, managers to monitor movement of their buses in real time, and also send alerts to guardians waiting for a pickup and drop. It provides a very simple user friendly web interface to track the school bus in fleet with pin point display on map and further simplifies information through SMS service.

The Id8 product provides privileged access to parents for finding the school bus location from their mobile by SMS and live tracking through Id8 mobile application which helps them to plan for pick-up and drop or plan for any contingencies.

### **Steps for Parents to install Id8 application.**

**Step 1:** Go to Google play store

**Step 2:** Search for Id8 application

**Step 3:** Download and install the application

**Step 4:** Open the Id8 application and enter the registered mobile number which you have shared with the school.

**Step 5:** You will be receiving the OTP, if, your mobile number is registered.

**Step 6:** Enter the OTP number it will take you to Id8 application.

**Step 7:** If there is any active trip for the student the bus will show in the map with the current location.

**Step 8:** In case of parents having more than one child using the school bus service, just select the child whose bus location you need information on and it will be made available if there is an active trip at the time.

**The port will be open from (31.07.2015)**
